

# A Commitment to Quality of Life

WE BELIEVE IN ENRICHING COMMUNITIES  
WHERE WE WORK.

We undertake social development work in all our host communities. From construction of roads and wells, improvement in drainage systems, access to modern healthcare, and provision of safe drinking water to training of local residents to improve their employability – across geographies, our efforts are aimed at mainstreaming those living at the fringes of the development process. Over the years, we have supported the Lifeline Express, a fully functional five-bogey train, that provides complete examination and operation theatre facilities on wheels. Thousands of patients have benefited during these medical camps in Madhya Pradesh.
